

Honeoye Lake 2020 VISION Project

Goal: to develop a community-based
vision of the future of Honeoye Lake
as a sustainable resource

Developed for our community

Developed by our community

The VISION Project will help us answer 3 key questions:

- What kind of lake do we have today?
- What kind of lake do we want tomorrow?
- What kind of lake can we get, given ecological, technological, geographical and financial limitations?

How will we gather information for the VISION Project?

- Individual interviews with technical experts who have conducted research on the complex ecosystem of Honeoye Lake
- Talking with focus groups, for example, civic organizations and recreational clubs, to get a broader sense of the community's goals
- Speaking directly with the public through events like this HVA annual meeting

Imagine it's the year 2020,
and Honeoye Lake has become
everything you would want it to be.

In your opinion, what are the best
three things about the lake in the
year 2020?

Please send us your vision for the
lake to info@hvaweb.org

“A lake with a view for the future”
