

# FILM SCREENING AND COMMUNITY DISCUSSION

## THE HEMLOCK WOOLLY ADELGID:

A Film About the Loss of an Ecosystem

Join CLWA and The Hemlock Initiative for a screening of Chris Foito's film "The Hemlock Woolly Adelgid", followed by a discussion with the state's top HWA researcher, Mark Whitmore (Forest Entomologist, Cornell University).

Attendees can expect to get the most complete and current information on the movement of this invasive forest pest across NYS. Property owners can learn more about HWA management options.

Film Screening and  
Community Discussion  
with Mark Whitmore (Cornell  
University)

**WHEN:**

Thursday, February 23<sup>rd</sup>  
6:30 – 8:00 PM

**WHERE:**

Ewing Family Community Room  
at the Wood Library  
134 North Main Street, Canandaigua

A FILM ABOUT THE LOSS OF AN ECOSYSTEM

## THE HEMLOCK WOOLLY ADELGID

It's an insect few people have heard of - yet it is devastating our hemlock trees and the delicate forest ecosystems that depend upon them. The hemlock woolly adelgid is infesting our own backyards of New York and has already spread throughout the east coast of North America from the Carolinas up into Canada. The documentary, "The Hemlock Woolly Adelgid" aims to engage and educate the viewer on this often overlooked invasive species by explaining its past, present, and what could easily be the future if significant action is not taken.
